Employment Data Reports	19%	31%	13%	-	-	38%

UT Communication Career Services conducted an online employment survey of the 2010 graduates of the College of Communication approximately six months after graduation. 585 replied – 41% of the total group of 1434 graduates. The results of this survey are summarized in one college-wide report and six major-specific reports. All employment survey results can be downloaded from the “Employment Data & Salary Surveys” link on the Communication Career Services homepage. We encourage students to pursue proactive career exploration throughout their college careers, including active involvement in student organizations, completion of multiple internships and other experiential learning programs and professional networking. Our staff provides career advising by appointment and on a drop-in basis to assist Communication students in their career planning and management, and we offer a wide variety of job and internship search services and career exploration programs.

Employment Survey Results & Reports

Communication Career Services surveys graduates of the UT College of Communication approximately six months after they graduate to gather information on their employment status. These employment reports contain salary information, employers & job titles, job satisfaction ratings, graduate school information, and much more. Communication Career Services Employment Reports are available in hard copy in the CCS office and can be downloaded from the "Employment Data & Salary Surveys" section of our web site.
